Access Control (472)

These acres are part of a CRP Contract. Exclude livestock, vehicles, and/or equipment from the contract area to protect and maintain the vegetative cover. CRP acres will not be used as a lane or road. Equipment storage is not allowed on CRP acres. Physical barriers may need to be installed to apply this practice. Refer to the Access Control (472) job sheet.

Conservation Cover (327)

These acres are part of a CRP Contract. Establish and maintain perennial vegetative cover to accomplish one or more of the following purposes: reduce soil erosion and sedimentation, improve water quality, create or enhance wildlife habitat. Refer to the conservation plan map for location(s). Seeding, establishment and management details are located on the seeding plan (IA-CPA-4), Conservation Cover (327) job sheet and other approved guidance. Seeding a nurse crop may be beneficial during the establishment period. Nurse crops such as oats must be mowed or clipped prior to seed maturity. Failure to follow the seeding and establishment guidance may result in the denial of cost share until requirements are met.

Operation and Maintenance:

Noxious weeds and other undesirable plants, insects, and pests shall be controlled, including such maintenance as necessary to avoid an adverse impact on surrounding land. Refer to practice standard Herbaceous Weed Treatment (315). After the establishment period, spot mowing, burning, hand pulling or spot herbicide treatment shall be used to control weeds and other undesirable plant growth. Starting in year 3, no mowing, spraying, or burning will be allowed during the primary nesting

season (May 15 through August 1), unless permission is granted by the FSA County Committee. Approved cover type according to the CRP contract must be established and maintained for the length of the contract period.

Early Successional Habitat Development-Mgt (647)

Manage for early plant succession to benefit desired wildlife. Mid-Contract Management (MCM) will be conducted on Conservation Reserve Program (CRP) acres once during the contract period. Established vegetation will be disturbed with tillage, herbicide application, prescribed burning, interseeding, mowing (CP8A waterway only), grazing or haying in order to create an early successional plant community. Mid-Contract activities are not to be completed during the primary nesting season (May 15 - August 1). Refer to Mid-Contract Management Options job sheet for details on which MCM activities are available for your CRP contract acres and details on how to implement the MCM activity.

Herbaceous Weed Treatment (315)

Control herbaceous weeds including invasive, noxious or prohibited plants in order to establish and maintain the approved CRP cover type. All volunteer trees and shrubs must be controlled. Weed control methods include mowing, herbicide application, prescribed burning, hand pulling or other acceptable means on areas enrolled in CRP. If applying herbicides on grass and forb mixtures use techniques such as spot treatment, timing and selective herbicides that target the weed. Reseed

after herbicide treatment to maintain the contracted cover type when necessary. Treatment methods will comply with all local, state and federal laws and ordinances. During years 1 and 2 of the contract, CRP areas must be mowed to control weeds. 3-4 mowing operations are needed the first year (seeding year) and 1-2 mowing operations are needed the second year to establish native plants. Establishing introduced grass stands may not require as much mowing. Starting in year 3, no mowing, spraying, or burning will be allowed during the primary nesting season (May 15 through August 1), unless permission is granted by the FSA County Committee. Mowing for cosmetic purposes is not allowed at any time. Contact your local FSA office for details.

Operation and Maintenance:

Following initial treatment, some regrowth, re-sprouting, or reoccurrence of herbaceous weeds may be expected. Spot treatment of individual plants or areas needing re-treatment will be completed as needed when weed vegetation is most vulnerable to desired treatment procedures. Reseed spot treatment areas as needed to maintain the contracted cover type. Refer to Herbaceous Weed Treatment (315) job Sheet for further details.
