# Mountain Creek Farm

Set across 54.04 acres in two parcels, Mountain Creek Farm offers a blend of protected farmland, agricultural productivity, and income-producing potential. A landscape of rolling farmland, open pasture, wooded acreage, mature oak trees, a pond, and creek frontage creates a setting that is both scenic and functional. Protected by a conservation easement with Three Rivers Land Trust, the property is intended to preserve its agricultural, scenic, and natural character while still allowing it to function as a working farm, private estate, or educational, recreational or research based property. The easement does not permit the existing historic house to be used as a residential dwelling; however, a designated one-acre building envelope allows for the construction of a future single-family residence. The existing homesite can operate as a produce store or for educational, recreational, or research based activities. The farm features an established blueberry operation with over 1,200 pesticide-free bushes, asparagus rows, and a seasonal U-pick blueberry business. Additional structures include a newly refinished 13-stall barn with hay loft and four-bay equipment shed/run-in, a milking parlor, storage barn, and grain silo. Currently used for agriculture, the land is also well-suited for horses, livestock, hunting, gardening, agritourism, hobby farming, and more. Mountain Creek Farm presents a rare opportunity to own a legacy property with both purpose and beauty, just 4 miles from downtown Albemarle, 5 miles to Badin Lake, and just an hour to Charlotte.

# Aerial

Parcel ID #655903426172 (13.67 Acres) & #655904516929 (40.37 Acres)  
54.04 Acres Total

# Imagine The Possibilities

*virtually staged images*

Create Your Own Hobby Farm, Equestrian Estate, or Homestead

Expand The Existing Blueberry Business Or Start Your Own Creamery

Run a produce stand or farm store

Revive The Historic Dairy Farm

# What Is A Conservation Easement?

---

A conservation easement is a permanent legal agreement that protects the land's agricultural, scenic, and natural character while allowing it to remain in private ownership. It is designed to preserve the property's conservation values over time while still allowing certain ongoing uses consistent with the easement terms.

## How Long Does It Last?

This conservation easement is perpetual, meaning it runs with the land and remains in place for future owners.

## What Activities Can I Do?

The easement allows for continued agricultural and rural use of the property, including farming, grazing, horticulture, equine activities, forestry, wildlife management, hunting, and low-impact recreation. It also allows certain uses such as produce sales and minimum-impact educational, recreational, and research activities, provided they remain consistent with the conservation values of the property and the terms of the easement.

## What Can I Build?

The easement allows the continued use, maintenance, repair, replacement, and in some cases construction of improvements tied to permitted agricultural, equine, and residential uses. Existing agricultural structures may remain, and the easement allows agricultural structures such as barns, sheds, stables, silos, and similar farm buildings. It also allows one new single-family dwelling with accessory outbuildings within the designated building envelope, and the historic structure may be used as a location to sell produce or for recreational, educational, and research purposes.
